Summary

B.Tech Computer Science and Engineering (AI & ML) undergraduate with hands-on experience in Python, Machine Learning, Deep Learning, Computer Vision, TensorFlow, Keras, OpenCV, Flask, and SQL. Experienced in developing AI-based applications, image classification systems, and conducting research in medical image analysis. Strong foundation in machine learning, deep learning, image processing, and software development. Seeking entry-level opportunities in AI/ML, Computer Vision, and Python development.

Education

Nagarjuna College of Engineering and Technology, Bengaluru	2023 – Present
B.Tech – Computer Science and Engineering (AI & ML)	CGPA: 7.98/10
Intermediate (MPC)	2021 – 2023 Score: 89%
Secondary School (SSC)	2021 Score: 100%

Projects

AI Motivator Web Application *Python, Flask, HTML, CSS*

- **Engineered** a Flask-based AI web application that classifies user mood into **4 categories: Happy, Sad, Bored, and Mixed**, and generates personalized motivational recommendations.
- **Implemented** Python-based mood classification and recommendation logic and integrated the application with a responsive HTML/CSS interface.

Trash to Tech – AI-Based Waste Classification *Python, OpenCV, Machine Learning*

- **Engineered** a computer vision-based waste classification system using **3,000+ images** across **5 categories: Plastic, Wood, E-Waste, Metals, and Glass**.
- **Implemented** image preprocessing and machine learning classification workflows using Python and OpenCV to automate waste categorization.
- **Developed** a recycling recommendation workflow that maps classified waste materials to potential useful products.

Krushak Hithaishi – Smart Agriculture Assistant *Python, AI, Computer Vision*

- **Engineered** an AI-powered agriculture assistant for crop monitoring, disease identification, and farmer decision support.
- **Developed** a computer vision-based workflow for crop disease detection and fertilizer recommendation.
- **Implemented** multilingual interaction supporting **4 languages: Telugu, Hindi, English, and Kannada**, improving accessibility for farmers.

Technical Skills

Programming: Python, Java, C

Machine Learning: Classification, Regression, Decision Trees, Random Forest, Model Evaluation

Deep Learning: CNN, TensorFlow, Keras, Neural Networks

Computer Vision: OpenCV, Image Processing, Image Classification, Image Preprocessing

Web Development: Flask, HTML, CSS

Database: SQL

Tools: Git, GitHub, Google Colab, Jupyter Notebook, VS Code, Docker

Research

Computational Methodologies for Automated Breast Cancer Detection: From Digital Image Processing to Deep Learning

- **Conducted** a comprehensive analysis of digital image processing, machine learning, and deep learning methodologies for automated breast cancer detection.
- **Investigating** AI/ML-based medical image analysis approaches for breast cancer detection and classification using computer vision and deep learning.

Achievements

- **Secured 2nd Prize** in the Trash to Tech project competition for developing an AI-based waste classification and recycling solution using computer vision and machine learning.
- **IC3MLA-2025 Conference:** Earned a conference certificate for academic and research engagement.

Certifications

- AWS Certified Cloud Practitioner
- AWS Academy Graduate – Cloud Foundation
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate
- NPTEL – Joy of Computing Using Python
- NPTEL – Cyber Security and Privacy
- Unity Essential Pathway
- Prompt Engineering for Everyone
- Building AI Agents Program
